

Each corner is a curve.

With Quaturis S, GRASS now offers a comfortable movement solution for standard base corner cabinets for the first time

With Quaturis S, a special swivel mechanism ensures that the ergonomically shaped shelves swing almost completely out of the corner cabinet, offering optimum access to the entire storage area. The fact that the lowest shelf automatically starts moving when the door is opened is not just pretty to watch, also brings all the stored items into view. The shelf can now be loaded and unloaded with great ease. In addition, the closing mechanism is particularly convenient because all the shelves retract back into the cabinet at a touch.

Naturally, gently damped by Soft-close.

QUATURIS CORNER CABINET SYSTEMS

Intelligent corner cabinet solutions for more storage space. Ergonomic, versatile and functional.

The right corner cabinet system turns a dead corner into the perfect storage space.

In times past you had to get down on your knees to reach the contents of base corner cabinets. With our Quaturis systems, that has all changed. Quaturis corner cabinet solutions always turn and swivel the stored items into the ergonomically optimum position so that pots and pans are accessible at the front of the base unit.

Making optimum use of storage space is one of the greatest challenges in modern furniture design. Particularly so when it comes to perfect organisation in the kitchen. And what nobody realises: corner areas hold the greatest potential.

QUATURIS CORNER CABINET SYSTEMS

With Quaturis we are squaring the circle. This is not advanced mathematics, but a fundamental principle for comfortable corner cabinet systems.

Innovation means being ahead of the times. With Quaturis, GRASS offers today what will be in demand tomorrow: functional and, above all, comfortable corner cabinet solutions for the most exacting demands. The product range comprises numerous corner solutions with semi-circular and circular shelves in wood or plastic. All components are perfectly matched and can be individually combined to meet the respective requirement. Furthermore, the closing process is particularly convenient because the Soft-close damping system gently slows the movement of the front and pulls it to the fully closed position.

These special characteristics make Quaturis a highly convenient functional system for the modern kitchen.
