**Movement Systems Guarantee**

**Product quality - The foundation of success for furniture manufacturers and consumers.**

Our customers in the furniture industry and in high-quality craft workshops rely on us. We accept this responsibility and we ensure that our products give many years of faultless function. Our facilities produce tens of thousands of these systems every day. To ensure that our products meet our high standards of quality management, each product series is thoroughly tested on site.

Our testing is governed by DIN and ISO regulations and our products are tested by independent institutes to achieve systematic quality assurance.

Our products are tested to the following opening and closing cycles:

- Hinge systems - 80 000 cycles
- Runner systems - 60 000 cycles
- Flap systems - 40 000 cycles

The following must be noted when installing GRASS hardware for a valid guarantee:

1. All hardware must be fitted to product specifications.
2. Hinges and drawers must not exceed the maximum load and/or width capacity.
3. Only a damp cloth must be used when cleaning the hardware, no chemicals.
4. The installation of granite tops and the cutting of materials should be done before the installation of the carcass members, as this fine dust will affect the function of the drawer.
